3. FAMILIES

Attending the game with your kids? With our flexible price point options, pick the seating area that works best for your family. Due to the high speed of the hockey game, we recommend choosing seating options behind either end where there is protective netting and you won't have to worry about pucks entering the seating area.

If you are attending the game with a child under the age of two, no need to purchase an additional ticket as they can sit on your lap.

Flashing lights and loud music are a part of the in-game experience, but you may want to bring protective earwear for young children.

4.
